Summary

B. Tech student specializing in Artificial Intelligence and Machine Learning with strong problem-solving, logical thinking, and analytical skills, experienced in analyzing data and building structured, real-world solutions. Skilled in designing and deploying scalable applications on AWS and Google Cloud using Docker, Terraform, Ansible, and Jenkins, focusing on automation, CI/CD, and Infrastructure as Code. Proficient in Python and SQL, with the ability to work both independently and in teams, seeking a Cloud/DevOps Internship to build efficient and scalable systems.

Projects

AI Chatbot for Hospital Appointment Booking

(May 2024 – Jul 2024)

Developed an AI-powered chatbot for hospital appointment booking, enabling real-time conversational interactions and reducing manual scheduling effort by 40% through automated appointment management. Designed and integrated intelligent conversation flows to assist users with appointment booking, symptom-based guidance, and hospital recommendations, enhancing user experience and accessibility. Implemented natural language understanding (NLU) capabilities to process user queries efficiently, improving response accuracy and streamlining patient engagement workflows.

Tools: AWS (Amazon Lex, IAM, CloudWatch)

GitHub Link: <https://github.com/karthikeya68/AIChatbot>

Dog Breed Classification System

(Sep 2024 – Nov 2024)

Designed and implemented a Multi-Cloud Disaster Recovery (AWS + GCP) architecture for a full-stack web application, improving system availability and reducing downtime by 30% through cross-cloud redundancy and failover mechanisms. Automated backup and replication of website files, backend services, and application data from AWS infrastructure to Google Cloud, ensuring minimal data loss and rapid recovery during outages or infrastructure failures. Established disaster recovery workflows, backup validation, and monitoring processes to enhance fault tolerance, data integrity, and business continuity across cloud environments.

Tools: AWS (EC2, S3, EBS, IAM, CloudWatch, AWS CLI), GCP (Compute Engine, Cloud Storage, IAM, Cloud Monitoring)

Multi-Cloud Disaster Recovery

(Jan 2025 – Mar 2025)

Designed and implemented a Multi-Cloud Disaster Recovery (AWS + GCP) solution, improving availability and reducing downtime by 30% through cross-cloud redundancy and failover mechanisms. Deployed a full-stack web application on AWS EC2 and automated backups of application and database data to Google Cloud, ensuring minimal data loss during failures. Implemented monitoring and recovery workflows to enhance fault tolerance, data integrity, and rapid service restoration across cloud environments.

Tools: AWS (EC2, S3, EBS, IAM, CloudWatch), GCP (Compute Engine, Cloud Storage, IAM).

AI Image Search Engine

(May 2026-Jul 2026)

Developed an AI-powered voice-based photo search engine that enables users to retrieve relevant images from large local photo collections using natural language voice commands. Implemented semantic image understanding by combining computer vision, speech-to-text processing, and vector embeddings, allowing concept-based image retrieval beyond traditional keyword searches. Built a high-performance similarity search pipeline using vector databases, delivering accurate image recommendations with confidence-based ranking and automated search result management.

Tools: Python, AWS (Amazon Rekognition, Amazon Bedrock Titan Embeddings, AWS Transcribe), FAISS Vector Database, Pillow (PIL), NumPy.

GitHub Link: <https://github.com/karthikeya68/AI-Image-Search-Engine>

Technical Skills

Amazon Web Services: EC2, S3, RDS, IAM, VPC, Lambda, CloudWatch, Auto Scaling.

DevOps & Automation: CI/CD (Jenkins, GitHub Actions), Terraform (IaC), Ansible, Bash.

Languages: Python, Java, C

AI & ML Tools: Amazon Rekognition, Amazon Lex, Amazon Bedrock, Amazon Textract, Amazon Comprehend, TensorFlow

Web Development: HTML, CSS, JavaScript, React, REST APIs

Certifications

- AWS Developer Associate, AWS AI Practitioner - **Amazon Web Services**
- Java Programming, Generative AI Professional - **Oracle Academy**
- Python - **Infosys Springboard**
- HTML and CSS Certiport - **Pearson VUE Business**
- C Programming Language - **Cisco Networking Academy**

Internship

AWS Development with DevOps- Technical Hub Pvt Ltd

(May 2025 – June 2025)

Developed and deployed a full-stack web application with frontend and backend services on AWS using EC2, S3, IAM, and CloudWatch for hosting, storage, access management, and monitoring. Applied DevOps practices including CI/CD, automation, and Infrastructure as Code (IaC) concepts to streamline application deployment and management. Gained hands-on experience in cloud architecture, scalability, security, and building reliable, highly available systems on AWS.

Education

B. Tech – Aditya College Of Engineering And Technology

(Jul 2023- May 2027)

- **Coursework:** Artificial Intelligence And Machine Learning
- **CGPA:** 7.87/10
